BIRD CALENDAR 1929 25th YEAR

Bulletin No. 1, March 31

By Professor W.H. Hulme

Weather conditions have been unusually favorable for Spring migrations in and around Cleveland this year. While there were a few brief blizzards and several heavy rain-storms between the middle of February and the end of March, there were a few but not so many and such sudden changes in the temperature, nor so much snow and ice as marked the corresponding period of the two or three preceding years. But the more favorable weather conditions this year would not seem to have influenced migratory birds very seriously. Few of the "old stand-bys" were observed before April 1st this year which did not appear before the corresponding date last year. Nevertheless, the First Bulletin this year contains between fifteen and twenty varieties more than the First Bulleting of 1928 can show. This difference is, however, mainly due to the fact that the number of winter residents and visitants seen this year is considerably in excess of that of last year. And this excess is the result, for the most part, of the large number of observers that is reporting this year. For in addition to the "faithful few" who have reported regularly for several years; Dean Bailey and his son Gilbert; Professor Finfrock and Dr. Valentine (who is lending his valuable help for the second year), the force of observers has been increased and strengthened by Mr. D.E. Johnson, a student of Adelbert College, Francis Gilliland, an interested Junior High boy of Shaker Heights, and several fresh irregulars.

As a matter of fact, the present "Bullet [sic] No. 1" is far the largest that has been issued (for the similar period) since Professor Herrick began to keep anything like a regular "Calendar" twenty-five years ago. This is not true, perhaps, of those years (and there were several) in which only 2 bulletins a year were issued. It was indeed, only comparatively recently that some systematic attempt was made to have three bulletins a year, the 1st covering the winter months and March, the 2nd the month of April, and the 3rd, May and the early days of June, - until the Spring migrations are meaSutherland Road, Shaker Hts.ably complete.

An effort is made in the present calendar to keep the record strictly alphabetical, bearing in mind the entire designation of each bird, as it appears to be most familiar to the uninitiated (Examples: American Goldfinch, Belted Kingfisher, Bronzed Grackle, Baltimore Oriole). Apropos, one observer reported the Baltimore Oriole this year for March 21, which must be considered a mistake unless it can be shown that an occasional Baltimore Oriole winters in the vicinity of Cleveland. As a matter of record, our Bird Calendar records the Baltimore Oriole nineteen times during the entire period (24 years) of its existence. This bird's first reported appearances in and around Cleveland have been: 11 times for May, 8 times for April and (to make the number twenty by adding the record for this year), 1 time for March. The April reports are,

with 3 exceptions, for the last week of the month, and the May reports, with 3 exceptions, for the first week of that month. The 3 early April records are April 6, 7, 10, and 2 of these early reports, April 10 and April 6, came from the same very intelligent person, a graduate from the College for Women, who was especially interested in Biological Studies, and resided in the country. The third early report – April 7, 1923, - was given by a presumably equally intelligent person from "E. 84th Street". The writer once expressed a mild skepticism to the reporter of the Oriole from the country so early in April, but she was positive that the bird she saw was a Baltimore Oriole. Chapman does not give much specific help in such cases. Her remarks (Handbook, ed. 1926, p 365), "N. Ohio, common S.R., April 15-Sept. 10;" which being interpreted is "Northern Ohio, common summer resident, April 15 – Sept. 10."

On the whole, it seems safer to believe that nobody has ever actually seen a Baltimore Oriole in the vicinity of Cleveland earlier than the middle of April, and then place on the observer who thinks he has seen one in March or early April, the actual burden of proving it by, perhaps, calling in somebody, if possible, who knows such common summer birds well. This year has been very favorable for such early migrations, if the weather really has much to do with this instinctive annual (or semi annual) business of the birds; but neither Oriole nor Myrtle Warbler, nor "Summer Yellowbird" has been reported by anybody down to today (April 24).

Dean Bailey and Gilbert's faithfully kept record of all the birds that are found in Lake View Gulch between September 30 and about June 1st, shows about the same winter residents and visitors this year that have appeared in their records for the past two or three years. About the same spring migrants – usually so denominated – have lingered in straggling numbers through the winter in Lake View Gulch, or on Oak Road, Cleveland Heights attracted especially by Professor Finfrock's well supplied feeding box.

Dean Bailey's record of southward migrations during October and early November are also worthy of careful study. The following birds bade farewell to Lake View, on the long journey to the far-away south the week following September 30 (1928): Blue-headed Vireo, Catbird, Lincoln Sparrow, Wood Thrush; at least they were not observed after that date. A Swamp Sparrow was seen in Lake View as late as November 1 and November 10; a White-crowned Sparrow on November 1, a House Wren and White-throated Sparrow on October 21 for the last time.

One warm, balmy evening about three weeks ago (April 5) a "Black Bat" was observed flying round above the boulevard close-by the Sovereign, busily plying his usual summer evening trade of gnat- or mosquito-catching.

Every bird on this Bulletin was, with one exception, first seen (or reported) before April 1st.

1. American Crow; seen twice by Dean Bailey between October 14 and February 16 in Lake View Cemetery, and then every week down to March 30; Feb. 25, (2), Wade Park; Feb. 27,

Francis Gilliland, Sutherland Road, Shaker Heights; March 1, Professor Finfrock, Oak Road, Cleveland Hts.; March 5, D.E. Johnson, Wade Park; March 6 and March 12, same place; March 17, D.E. Johnson, S. Madison, O.; March 20 (several), Lake View Cemetery; March 24, D.E. Johnson, S. Madison, O..; March 26, Dr. Valentine, (2) Shaker Lakes; March 28, Professor Visscher, Chagrin Valley; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine (about 100) Mentor Headlands; April 6 (several) Mentor Headlands; April 6, Grand River near Unionville, Ohio.

2. American Eagle; March 28, Professor Visscher, Chagrin Valley.
3. American Goldfinch; seen 6 times by Dean Bailey between Sept. 30 and Nov. 17; Jan. 25, Francis Gilliland, Sutherland Road, Shaker Hts.; Feb 7, Professor Finfrock, Little Mountain; April 21, Professor Bourland (3) Gates Mill.
4. Barred Owl; March 24, D.E. Johnson, S. Madison, O.
5. Bartramian Sandpiper; March 28, Professor Visscher, Chagrin Valley.
6. Belted Kingfisher; March 26, Dr. Valentine, Shaker Lakes; April 2 (2), Wade Park; April 3, Dr. Valentine (4), Mentor Marshes; April 16 (1), Wade Park; April 21 (1) Rockefeller Park.
7. Bluebird; March 3, Professor Finfrock, Oak Rd., Cleveland Hts.; March 11, Mrs. Dr. Ruedy, Noble Road; March 13, D.E. Johnson, Wade Park; March 17, same observer, S. Madison, O., (19) and Francis Gilliland, Sutherland Road, Shaker Hts.; March 20 (2), Lake View Cemetery; March 24, Dean Bailey, Lake View; same date, D.E. Johnson (10), S. Madison, O.; March 28, Professor Visscher, Chagrin Valley; April 2, Wade Park; April 3, Dr. Valentine (4), Mentor Headlands; April , (many), County Line Rd., Unionville, O.
8. Bluejay; recorded weekly by Dean Bailey in Lake View from Sept. 30 to Dec. 1, and only once (Feb. 2) more before April 1; throughout winter, Professor Finfrock, Oak Rd., Cleveland Hts.; Feb 26 (2-3) Hessler Rd.; March 17, D.E. Johnson, S. Madison, O.; March 24, same observer (7), and same place; March 26, Dr. Valentine, Shaker Lakes; March 30, Dean Bailey, Willoughby.
9. Bob White (Quail); seen almost weekly by Dean Bailey in Lake View from Oct. 14 to March 31; Feb. 7, Professor Finfrock, Little Mountain; Feb 11, Francis Gilliland, Sutherland Road, Shaker Hts.; April 3, Dr. Valentine, (2), Mentor Headlands; April 6-7 (several heard), Unionville, O.
10. Bronzed Grackle; Feb. 28, Francis Gilliland, Sutherland Road, Shaker Hts.; March 3, Professor Finfrock, Oak Rd., Cleveland Hts.; March 12, D.E. Johnson, Wade Park; March 13 (2) Wade Park; March 17, D.E. Johnson (5) S. Madison, O.; March 20, (several), Lake View; March 23 (many) Kinsman Road, Shaker Heights; March 24, D.E.

Johnson (5) S. Madison, O.; March 26, Professor Visscher, Chagrin Valley; March 29 (several) Lake View; March 31, Dean Bailey, Willoughby; April 2, (many), Wade Park; April 3, Dr. Valentine (about 30), Mentor Headlands; (several) Unionville, O., April 6 or 7.

11. Brown Creeper; Jan. 3, Francis Gilliland, Sutherland Road, Shaker Hts.; March 26, Professor Visscher, Chagrin Valley; April 3, Dr. Valentine (about 15), Mentor Headlands; same date (several), Wade Park; April 4 (several heard and seen), Wade Park; same date, Mrs. Dr. Ruedy, Noble Rd.; April 5 (numerous in Wade and Rockefeller Parks); April 8-10, increasing rapidly in Wade and Rockefeller Parks.
12. Cardinal; seen by Dean Bailey continuously, week by week in Lake View Cemetery, from Sept. 30 to March 31; also seen throughout winter by Professor Finfrock on Oak Rd., Cleveland Hts.; and in Wade or Rockefeller Park; Cardinals have been singing their spring song in or around Wade Park since late in February. They have been seen from time to time in other localities; Feb. 9, Francis Gilliland, Sutherland Road, Shaker Hts.; Feb. 10, same observer, and same place; March 6, heard singing East 115th St.; March 17, D.E. Johnson, E. Madison, O.; April 3, Dr. Valentine, Mentor Headlands, etc., etc.
13. Cedar Waxwing; March 14, D.E. Johnson, Wade Park.
14. Chickadee; seen regularly almost every week by Dean Bailey in Lake View from Sept. 30 to March 31; throughout winter by Professor Finfrock, Oak Rd., Cleveland Hts.; and occasionally during winter in Wade Park; Jan 23, Francis Gilliland, Sutherland Road, Shaker Hts.; Feb. 9, same observer and same place; March 17 D.E. Johnson, S. Madison, O.; March 25, Dr. Valentine, Shaker Lakes; April 3, same observer (4), Mentor Headlands; April 6-7 (several) Unionville, Ohio; etc., etc., etc.
15. Chipping Sparrow; March 24, D.E. Johnson, S. Madison, O.; April 4, Mrs. Dr. Ruedy, Noble Rd.; April 6-7, (several), Unionville, O.; April 18, Professor Bourland, Wade Park.
16. Cowbird; March 17, D.E. Johnson (2), S. Madison, O.; same date, Francis Gilliland, Sutherland Road, Shaker Hts.; March 23, Professor Finfrock, Oak Rd., Cleveland Hts.; same date, Kinsman Road, Shaker Heights; March 24 and 31, Dean Bailey, Lake View; April 3, Dr. Valentine, Mentor Headlands; April 5-6, Miss Smith, Green Springs, Ohio; April 6-7 (several), Unionville, Ohio.
17. Downy Woodpecker; seen regularly from Sept. 30 to March 31 by Dean Bailey in Lake View; throughout winter by Professor Finfrock, Oak Rd., Cleveland Hts.; occasionally during winter in Wade Park; Feb. 5 and 10, Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, D.E. Johnson

(2), S. Madison, O.; March 24, same observer (6) same place; March 26, Dr. Valentine, Shaker Lakes.

18. English Sparrow; seen throughout winter by various observers in many places.
19. Field Sparrow; March 24, Dean Bailey, Lake View; same date, D.E. Johnson (2) S. Madison, O.; March 26, Wade Park, (several feeding on ground with flock of Juncos); March 28, Professor Visscher, Chagrin Valley; April 2, Wade Park and Campus of College for Women (many feeding on ground with Juncos, 2-3 sitting on jutting stones of chapel wall, unusually tame); April 3, Dr. Valentine (4), Mentor Headlands; same date, and April 4, Wade Park (many feeding on ground with Juncos); April 6, Unionville, many seen and heard; same date, Mrs. Dr. Ruedy, Noble. Rd.
20. Flicker; Dec. 20, one seen in an apple tree between Graduate School and Excelsior Club, Euclid Ave.; March 13, Francis Gilliland, Sutherland Road, Shaker Hts.; March 15, Wade Park, March 17, D.E. Johnson, S. Madison, O.; March 23, Professor Finfrock, Bedford Glens; March 24, D.E. Johnson, S. Madison, O.; March 25, Mrs. Dr. Ruedy, Noble Rd.; March 26, Dr. Valentine (2) Shaker Lakes; March 28, Professor Visscher, Chagrin Valley; March 30, Dean Bailey, Willoughby; April 2 (2) Wade Park; April 3, Dr. Valentine, (about 30) Mentor Headlands; April 6-7 (several), Unionville, O.; April 8-10, Wade Park (large numbers).
21. Fox Sparrow; March 17, D.E. Johnson (5), S. Madison, O.; March 24, same observer (6), same place; March 26, Dr. Valentine, Shaker Lakes; April 2 (1), Wade Park; April 3, Dr. Valentine (6), Mentor Headlands; April 4 (2), Wade Park.
22. Golden-crowned Kinglet; Jan 4, (several), Wade Park and Rockefeller Park; March 26, Dr. Valentine, Shaker Lakes (6); March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine (15) Mentor Headlands; April 4-5, 8-10, 18, Wade Park (many seen).
23. Grasshopper Sparrow; March 23, Professor Finfrock, Bedford Glens; April 2, Wade Park, (several on ground that were neither Field nor Vesper Sparrows.)
24. Greater Scaup Duck; March 26, Dr. Valentine (3) Shaker Lakes; same dates (8, six males, two females) Lower Shaker Lake; April 3, Dr. Valentine (about 200), Mentor Marshes; April 23, Lower Shaker Lake (20, eleven females, nine males).
25. Hairy Woodpecker; seen by Dean Bailey frequently during the winter, Lake View; Feb 2, Professor Finfrock, Chardon.
26. Herring Gull; Jan 20, Gordon Park (2); March 3, same observer (1), same place; March 10, same observer (2) and place; April 3, Dr. Valentine (6) Mentor Marshes.

27. Hermit Thrush; March 26, Dr. Valentine (1), Shaker Lakes; March 30, Dean Bailey, Willougby; April 15, Professor Bourland (3, possibly Wood Thrushes), Chagrin Valley above Gates Mill, April 21, Mrs. Dr. Ruedy, Noble Rd.
28. Horned Lark; Feb. 7, Professor Finfrock, Little Mountain; March 30, Dean Bailey, Willoughby.
29. Junco; seen by Dean Bailey from Sept. 30 to Feb. in Lake View, but not again reported by him till March 24; throughout winter by Professor Finfrock, Oak Road, Cleveland Hts.; occasionally during the winter and frequently in large numbers during March, Wade Park; late in March and early in April frequently feeding on the ground with Field Sparrows; Jan. 2, Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, D.E. Johnson, S. Madison, O.; March 24, same observer and place; March 26, Dr. Valentine (about 30), Shaker Lakes; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine (10) Mentor Headlands; April 6, (many), County Line Road, Unionville, Ohio.
30. Killdeer Plover; March 2, Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, D.E. Johnson, S. Madison, O.; March 21, same observer, Wade Park; March 23, Wade Park and Warren Center Road (2-3) heard and seen; March 24, D.E. Johnson, S. Madison, O.; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine, Mentor Headlands; April 6-7, County Line Road, Unionville, O. (several heard and seen); April 22, Mrs. Dr. Ruedy, Noble Rd.
31. Louisiana Water-Thrush; March 31, Dean Bailey, Lake View.
32. Meadow Lark; Jan 3, Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, D.E. Johnson (8), S. Madison, O.; same date, Mrs. Dr. Ruedy, Noble Rd.; March 18, Professor Bourland (several), Gates Mill; March 23, Professor Finfrock, Oak Road, Cleveland Hts.; same date, (several), Kinsman Road, Shaker Hts.; March 24, D.E. Johnson (6), S. Madison, O.; March 26, Dr. Valentine, Shaker Lakes; March 30, Dean Bailey, Willoughby; same date (several), Wade Park; March 31, Dean Bailey, Lake View; April 3, Dr. Valentine (about 30), Mentor Headlands; April 6-7, Unionville, O. (many heard and seen).
33. Mourning Dove; Dec 28 and Jan. 1 (a winter resident), Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, Dean Bailey, Lake View; March 15, Wade Park, (1 heard); March 23, Mrs. Dr. Ruedy, Noble Rd.; March 28, Professor Visscher, Chagrin Valley; March 29, Lake View (3-4 seen and heard); March 30, Dean Bailey, Willoughby; March 31, Professor Finfrock, Oak Road, Cleveland Hts.; same date, Dean Bailey, Lake View; April 2, Wade Park (1 heard); April 3, Dr. Valentine, Mentor Headlands; April 6-7, Unionville, O. (several seen and heard).

34. Northern Shrike; Feb. 7, Professor Finfrock, King Memorial Highway.
35. Phoebe; March 2, Miss Wells (heard), Taylor Road, Cleveland Hts.; March 13, same observer and place; March 18, Professor Bourland, Gates Mills; March 23, Professor Finfrock, Bedford Glens; same date, Ambler Road, Cleveland Hts. (1 seen); March 24, D.E. Johnson, (2), S. Madison, O.; March 26, Dr. Valentine, Shaker Lakes; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine, (2) Mentor Headlands; April 6, Grand River Bridge (1) near Unionville, O.
36. Pileated Woodpecker; Feb. 24, Professor Finfrock, Mr. G.H. Gardner's home, Gates Mill; April 6, Grand River Bridge, near Unionville, O. (1 heard close by).
37. Purple Finch; March 23, Professor Finfrock, Bedford Glens ("a flock of 20 picking away at the swelling buds").
38. Purple Martin; March 1, Francis Gilliland, Sutherland Road, Shaker Hts.; April 7, Unionville, O.
39. Red-bellied Woodpecker; March 17, D.E. Johnson, S. Madison, O.
40. Redpoll; Jan 19, Francis Gilliland (6), Sutherland Road, Shaker Hts.
41. Red-shouldered Hawk; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine (4), Mentor Marshes.
42. Red-tailed Hawk; Feb. 7, Professor Finfrock, Chardon, O.; March 17, D.E. Johnson, (3), S. Madison, O.; April 3, Dr. Valentine (4), Mentor Headlands.
43. Red-winged Blackbird; March 1, Francis Gilliland, Sutherland Road, Shaker Hts.; March 17, Dean Bailey, Lake View; March 18, Mrs. Dr. Ruedy, March 20, same place (several); March 23, Professor Finfrock, Bedford Glens; March 26, Dr. Valentine, Shaker Lakes; March 28, Professor Visscher, Chagrin Valley; March 29, Lake View (several); March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine, (appr. 40), Mentor Marshes.
44. Ring-necked Pheasant; Dec. 23, Dean Bailey, Lake View; Feb. 7, Professor Finfrock, King Mem. Highway; April 2, Wade Park (2 hens seen crossing Magnolia Drive near the Art School).
45. Robin; March 3, Miss Etzensperger (2), Willoughby; same date, Professor Finfrock, Oak Road, Cleveland Hts; same date, Donald Hulme, New Philadelphia, Ohio; March 3, Mrs. Hulme, College for Women Campus; same date, D.E. Johnson, Wade Park; same date, Donald Hulme (3), Wade Park; March 6, Wade Park (2-3); March 11, Francis Gilliland, Sutherland Road, Shaker Hts.; March 13, College for Women Campus (many); same date, Mrs. Dr. Ruedy, Noble Rd.; March 17, D.E. Johnson (18), S. Madison, O.; March 18, Professor Bourland, Gates Mill; March 24, D.E. Johnson, (40), S. Madison, O.; March 26, Dr. Valentine, (ap. 30) Shaker Lakes; March 28, Professor Visscher, Chagrin Valley; March 30, Dean Bailey,

Willoughby; April 3, Dr. Valentine (ap. 200), Mentor Headlands; April 6-7, Unionville, O. (many) March 31, Professor Finfrock saw an albino Robin on Loe Road opposite Sycamore Road; "head, neck and shoulders pure white, wings were splotched with white."

46. Ruffled [Ruffed] Grouse; Feb. 2, Professor Finfrock, Little Mountain.
47. Screech Owl; Feb. 21, Francis Gilliland, Sutherland Road, Shaker Hts.
48. Snow Bunting; Feb. 7, Professor Finfrock, King Memorial Highway.
49. Song Sparrow; Seen regularly every week throughout the winter by Dean Bailey and his son Gilbert in Lake View; Jan 11, Wade Park (1); March 1, Francis Gilliland, Sutherland Road, Shaker Hts.; March 2, D.E. Johnson, Wade Park; March 7, Professor Finfrock, Chardon; March 15, Wade Park (2-3) heard; March 17, D.E. Johnson, (8), S. Madison; March 18, Professor Bourland, Gates Mill; March 20, Lake View (several); March 24, D.E. Johnson (20), S. Madison, O.; March 26, Dr. Valentine (12) Shaker Lakes; March 28, Professor Visscher, Chagrin Valley; March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine (ap. 100) Mentor Headlands; April 6-7, Unionville, O. (many).
50. Sparrow Hawk; Feb. 7, Professor Finfrock, Ridge Road, Willoughby; Feb. 16, Dean Bailey, Willoughby; April 3, Dr. Valentine, (ap. 100), Mentor Headlands; April 12, Wade Park.
51. Starling; seen frequently throughout winter by Professor Finfrock, Oak Road, Cleveland Hts.; also constantly in Wade Park, and occasionally by Dean Bailey in Lake View.
52. Towhee; Feb. 7, Professor Finfrock, Little Mountain; March 17, D.E. Johnson (2) Madison, O.; March 24, same observer and same place; March 30, Dean Bailey, Willoughby; ; April 3, Dr. Valentine, Mentor Headlands; April 6, Grand River, near Unionville, O. (1).
53. Tree Sparrow; seen once about every week by Dean Bailey, from Oct. 14, to March 31 in Lake View; throughout winter by Professor Finfrock, Oak Road, Cleveland Hts.; Feb. 8, Lake View (several seen feeding in bulrushes under snow-covered tufts of weeds and grass and sportively darting out from the covert through the snow); Feb 9-10, Francis Gilliland, Sutherland Road, Shaker Hts.; March 12, Wade Park (2-3); March 24, D.E. Johnson (1), S. Madison, O.; March 25, Dr. Valentine (2) Shaker Lakes; March 30, Dean Bailey, Willoughby.
54. Tufted Titmouse; Feb. 7, Professor Finfrock, Chardon, O.; March 17, D.E. Johnson (4), S. Madison, O.; March 24, same observer (3) and same place; March 29, Francis Gilliland, Sutherland Road, Shaker Hts.; March 30, Dean Bailey, Willoughby; March 31, same observer, Lake View; April 3, Dr. Valentine (1), Mentor Headlands.

55. Vesper Sparrow; March 26, Dr. Valentine (1) Shaker Lakes; March 30, Dean Bailey, Willoughby; April 1, Wade Park, (small flock feeding on the ground); April 2 same place, (same flock feeding and singing); April 3, Dr. Valentine, Mentor Headlands; same date, Mrs. Dr. Ruedy, Noble Rd.; April 6-7, County Line Road, Unionville, O. (many seen and heard).
56. White-breasted nuthatch; seen almost every week from Sept. 30 to March 31 by Dean Bailey in Lake View; throughout the winter by Professor Finfrock, Oak Road, Cleveland Hts.; Jan. 12, Francis Gilliland, Sutherland Road, Shaker Hts.; Feb. 23, Wade Park; March 17, D.E. Johnson (2) S. Madison, O.; March 24, same observer and place (4); March 30, Dean Bailey, Willoughby; April 3, Dr. Valentine, Mentor Headlands.
57. White-throated Sparrow; Feb. 2, Professor Finfrock, Lake View; March 24, Dean Bailey, Lake View; same date, Dean Bailey, Lake View; March 30, same observer, Willoughby; April 20, Mrs. Dr. Ruedy, Noble Road.
58. Winter Wren; March 3, Dean Bailey, Lake View; March 23, Professor Finfrock, Bedford Glens; March 29, Lake View; March 30, Dean Bailey, Willoughby.
59. Yellow-bellied Sapsucker; April 2, Wade Park (2-3); April 3, Dr. Valentine, Mentor Headlands; April 4-5, Wade Park (several); also seen and heard in same place April 8-10, 18; April 6, Mrs. Dr. Ruedy, Noble Road.
